

## Executive Profile

### **Tom McAlees**

*Senior Vice President of Engineering and Operations*

Tom McAlees is responsible for strategic planning and leadership for all IT, operational, and product engineering activities at Veramark.

Tom brings his personal passion for software architecture and process design to his leadership role at Veramark. With more than 20 years of experience in enterprise solution architecture and engineering, application integration, configuration management and software consulting, Tom is well qualified to lead software organizations to higher levels of innovation.

A strong proponent of Services Oriented Architecture (SOA) and Software as a Service (SaaS), Tom is helping Veramark develop and deliver the organization's expense management solutions in the most efficient manner possible. The engineering and architecture changes underway are laying the groundwork for the next generation of IT financial management solutions.
